# **New version (V13) of Fujitsu Interstage XWand selected as XBRL Processing Engine for Sopra Banking Compliance – Report solution**

---

**KRAKÓW – October 2, 2017** – Fujitsu today announced that the new version (V13) of its comprehensive, market-leading XBRL software offering, [FUJITSU Software Interstage XWand](#), is included in the Sopra Banking Compliance – Report Solution, which is available for more than 100 European customers. Interstage XWand supports the efficient development and delivery of state-of-the-art, end-user-driven specific XBRL capabilities in areas such as extension, mapping, tagging, generation, validation, rendering, visualization and creation of financial statements and regulatory filings, in electronic format and in accordance with XBRL standards.

Interstage XWand is the product of Fujitsu's pioneering efforts to evolve the XBRL standard. With advanced technological capabilities, superior performance and strict standards compliance, the Fujitsu XBRL engine has been deployed by financial institutions, software and service providers, National Competent Authorities (NCAs) and companies in over 50 countries worldwide. The adoption by Sopra Banking Software for CRDIV reporting supports Fujitsu's reputation as a leader in this increasingly important field, as regulatory compliance requirements around the world continue to grow more complex and more stringently enforced on financial markets.

“We are very pleased to form a long and strategic partnership with Fujitsu to incorporate Interstage XWand into Sopra Banking Compliance - Report. Fujitsu is a company that prides itself in being at the forefront of innovation we share with Sopra Banking Software the same passion of delivering regulatory reporting solutions to be second to none with unique features, reliability, performance. Fujitsu software is one of very few on the market that allows efficient XBRL processing purely in-memory, i.e. without intermediary formats, and enables both ‘bolt-on’ implementation and deep integration with any technologies and platforms depending on the organisation readiness. We are pleased to offer our customers the exceptional functionality of Interstage XWand, a solution that we consider to be the most complete XBRL Processing Engine on the market today”, said Jean-Claude PICHON, Alliance Manager at Sopra Banking Software.

“Our significant investment in software research and development and participation in the various working groups involved with building the enhancements to the XBRL specification (as a Direct Member and Sustaining Partner of XBRL International) gives our partners confidence that they will be equipped with highly scalable XBRL solutions that will address their current and future needs.

We look forward to continuing to build on our success to provide the best-in-class solutions that help solve those needs”, said Sławomir Skrzypek, Business Development Director – BI at FQS Poland Ltd (EMEA Center of Excellence for Fujitsu's XBRL software).
